

1、电气性能 Electrical Characteristics

序号 NO.	项目 Item	测试条件 Measuring condition	规格 Specification
1	胶圈密封性 Sealing performance of rubber ring	设计输入测试参数，把产品放进爆破机测试模具中。 Design input test parameters and put the product into the testing mold of the blasting machine	Vent 爆破前不漏气 Vent does not leak before blasting
2	CID 断开压力 CID Off Pressure		CID 与 Vent 的断开 0.9-1.3Mpa(断开后不能有拉丝短路现象) Disconnect CID and Vent at a pressure of 0.9-1.3Mpa (there should be no wire drawing short circuit after disconnection)
3	爆破压力 Burst pressure		爆破压力 1.9-2.5Mpa Burst pressure 1.9-2.5Mpa
4	内阻值 Internal resistance value	夹具夹住上下两个面，用内阻测试机测试。 Clamp the upper and lower surfaces and test with an internal resistance tester.	$\leq 0.35 \text{ m}\Omega$

2、产品外形图 Product Drawing
